

## SANTIAGO DRAG PERFORMANCE

■ MAX DRAG AT "STRIKE" with free spool  
■ LOCK-DOWN DRAG AT "FULL"

**PERFORMANCE COMMITMENT:** Every Fin-Nor Santiago reel is serial-numbered and individually performance-tested by our engineers. The results generated by these tests are recorded, and a specific report is provided in your Santiago's packaging.

SA25 | SA30 | SA30W | SA50 | SA50W | SA80W

# Santiago™

**SA25**  
WEIGHT: 67.5 oz.  
SPOOL WIDTH: 1.85" / 47mm

**SA30**  
WEIGHT: 70.0 oz.  
SPOOL WIDTH: 2.40" / 61mm

**SA30W**  
WEIGHT: 73.5 oz.  
SPOOL WIDTH: 2.95" / 75mm

**SA50**  
WEIGHT: 83.0 oz.  
SPOOL WIDTH: 2.48" / 63mm

**SA50W**  
WEIGHT: 88.0 oz.  
SPOOL WIDTH: 3.34" / 85mm

**SA80W**  
WEIGHT: 142.1 oz.  
SPOOL WIDTH: 3.46" / 88mm

## SANTIAGO LINE CAPACITIES

MODEL	MONO CAPACITY	BRAID CAPACITY	GEAR RATIO (HI / LOW)
SA25	625 yds. / 25 lb.	1600 yds. / 30 lb.	1.75:1 / 4.15:1
SA30	800 yds. / 30 lb.	1680 yds. / 50 lb.	1.75:1 / 3.79:1
SA30W	700 yds. / 50 lb.	1600 yds. / 80 lb.	1.75:1 / 3.79:1
SA50	730 yds. / 50 lb.	1100 yds. / 100 lb.	1.75:1 / 3.17:1
SA50W	550 yds. / 80 lb.	900 yds. / 130 lb.	1.75:1 / 3.17:1
SA80W	1000 yds. / 80 lb.	1600 yds. / 130 lb.	1.35:1 / 3.07:1

Line capacities calculated at 80% of max spool capacity to allow for top-shots and leaders.

## The Finest Big Game Trolling Reel We've Ever Made.

Santiago was designed to be the best big game reel in the world. . .and it is.

It's the first big game trolling reel designed with all of today's modern fishing techniques in mind – techniques that demand light-weight rods, stronger and thinner-diameter braided lines and more aggressive boat techniques. The trend may be towards smaller overall size, but the demand is still for maximum strength. And Santiago is pure strength.

Forged and machined using high-quality aircraft-grade aluminum, we stuffed in machined stainless steel gears and an over-sized center shaft because we know what big battles are, and what they can do to average equipment.

With six sizes in the Santiago family to use, all equally capable with 50, 80, or 100-pound braid line and beyond, you'll never have to worry about strength or drag power, no matter which size you choose.

# Santiago™

by FIN-NOR®

### Fully Machined 1-Piece Aluminum Frame & Side Plate

Forged and then machined for precision from the finest 6061-T6 aircraft-grade aluminum for perfect tolerances and strength, Santiago has a one-piece integral frame and left-side plate, and another one-piece aluminum right-side plate. This makes Santiago stronger than most other trolling reels, and able to handle heavy loads of big fish on heavy braided lines. No situation is too big for Santiago.

### Adjustable Lever Drag

Santiago gets up to 100 pounds of drag pressure (SA80W). We know that few anglers would ever want, or need, to fish with that much drag pressure, isn't it nice to know you can? Even the smallest model (SA25) has up to 60 pounds of drag available. This means you could fish 100-pound braided line on our smallest reel and still tackle a giant fish.

### Easy Two-Speed Control

Without even having to take your hand off the handle, you can quickly shift into a low, powerful gear with a simple push of a button. And, with a quick twist-out, you're back to high-speed. 2-speed shifting has never been so logical – and fighting a big fish has never been so simple.

### Ergonomic Handle Knob

This special oversized handle knob has been designed to be comfortable regardless how you hold it, and for as long as you need to hold it. Don't worry about fatigue, or about sharp or uncomfortable edges that can irritate or blister your hands. . .just focus on the fish.

### Strong Carbon Fiber & Stainless Steel Drag System

Santiago has a machined stainless steel drag plate that is water-tight and sandwiched between two massive carbon fiber washers to achieve smooth but powerful drag numbers, letting you stand up or sit in the chair to battle big fish without strain on the reel.

### Oversized Bearings & Center Shaft

Santiago's spool rides on a sleeved, oversized machined stainless steel center shaft – the strongest in the business – and is supported by the largest race ball bearings. This reel is designed to handle heavy loads and still perform smoothly and efficiently.
